

# A new generation of AST systems is born

## The ASTa system provides

- Phenotypic AST directly from positive blood cultures
  - Culture-based AST results within 6 hours
  - True Minimal Inhibitory Concentration (MIC) reporting
- Fully automated analysis
  - 6 patient samples analyzed in parallel with random access
  - Minimal hands on time, load-and-go workflow
- Comprehensive AST panel containing 30+ antibiotics

**Antibiotic Susceptibility Testing**
